A **BMS** Group Company

RMS Motors

An ISO 9001 - 2015 Company

Basic Life Support Ambulance

Fully equipped to handle patients needing basic life support. Ambulance is equipped with an Oxygen delivery device, Auto Loader, Scoop Stretcher Wheel Chair, Spine Board, Electrically operated Suction Unit etc.

RMS Motors core business is to design, manufacture, supply, install & maintain/service of products right from the basic two wheeler first responders, patient transfer vehicles, BLS, ALS, ACLS, ATLS ambulances to highly sophisticated mobile hospital & other emergency vehicles

RMS mobile medical units comes in all shapes & sizes from small to large self-propelled vans and chassis & semi-trailer configuration.

RMS understands that each customer has unique requirements therefore providing "Standard Design" will not be appropriate. We pride ourselves in finding out what our customer want thus customizing our mobile units to meet their needs.

Advanced life support ambulance

The ambulance is a more compact version of the intensive care unit with many of the same features. Clever use of space and innovation design enhance an ergonomic work area.

Ambulance carry critical care equipments including an ECG Monitor, Defibrillator, Syringe Pump, Suction Unit, Portable Ventilator, N2O + O2 Cylinder for immediate pain relief (optional), Patient care critical monitor, Immobilization Kits & Extrication devices

Ambulance is provided with separate sections for storing each equipment

- ⊕ Customized design
- ⊕ Imported LED lights for great look
- ⊕ Storage compartments for Oxygen cylinders, AED, Splints etc.
- ⊕ Can be built on any platform

First Responder Vehicle

Life Saving Equipments

Critical Care Monitor

US FDA & CE approved monitors as per the need and budget

- ⊕ Large data storage
- ⊕ Display size from 7" to 10"
- ⊕ Light weight & portable for transport application

Suction Units

- ⊕ Manual and electrical suction units
- ⊕ Low cost, High performance units
- ⊕ Long life
- ⊕ Also available high end electronic suction units with US FDA certificate

Life Saving Equipments

Can be equipped with

- ⊕ Transport Ventilator
- ⊕ Syringe Pump (1/2/3/4 channel)
- ⊕ Scoop Stretcher
- ⊕ Spine Board
- ⊕ Auto Loader
- ⊕ N20+O2 Cylinder (Entonox)
- ⊕ Emergency Carry Case
- ⊕ Wireless health monitoring system

AED

- ⊕ Biphasic Technology with latest AHA guidelines.
- ⊕ Light weight with long battery backup
- ⊕ Both adult & Pediatric capability
- ⊕ Color coded electrodes for both Adult & Pediatric

Defibrillator

- ⊕ Advanced biphasic defibrillator with built in multipara monitor & 12 lead ECG Monitoring
- ⊕ Maximum energy level up to 360 joules
- ⊕ Adult & Pediatric mode selection
- ⊕ 3G Up gradation for sending data's while on move

ECG Machines

- ⊕ US FDA approved 3/6/12 channel ECG machines as per the need and budget
- ⊕ Easy to use
